BREAKING NEWS: Severe rain storms expected today in NJ that can cause electrical outages. Carbon Monoxide poisoning is an immediate danger and more prevalent during bad weather.

SAFETY TIPS TO PREVENT CARBON MONOXIDE POISONING DURING BAD WEATHER:

In the event of power outages, take these precautions:

1. Do not bring portable generators, gas-powered equipment or heating items into a closed home or garage.
2. Never cook or heat with charcoal indoors.
3. Check the batteries on your carbon monoxide detector.
4. If you don't have a detector, install one before the bad weather hits.
5. Keep your home well ventilated. If need be, keep a window slightly cracked to allow air flow.
6. Open flues if you are using a fireplace.
7. Do not idle a car in a closed garage. Once you pull in, immediately turn off the engine.
8. Have a flash light or candles and matches at the ready.

IF YOU SUSPECT CARBON MONOXIDE POISONING TAKE IMMEDIATE ACTION:

- Get out of the house and
- Contact your local fire department immediately.
- Do not waste time opening windows or trying to "air" out the house/building; which will delay your escape from possibly dangerous fumes.

Newark, N.J., March 10, 2011— With severe rain storms predicted today, New Jersey residents are warned to take necessary steps to make sure the storms pass as safely as possible. During bad weather, it is not uncommon for homes and offices to experience power outages. Responding by bringing generators and gas-powered items indoors is dangerous and potentially poisonous.

During bad weather, residents tend to close down their homes, but frequently bring items indoors with them that are potentially more dangerous than the bad weather outside. Carbon monoxide is a particularly danger as it is an odorless and colorless gas that is only easily detected with an installed and fully functional carbon monoxide detector.

Help is Just a Phone Call Away

If you suspect carbon monoxide poisoning, or have questions about the safety of an item in your home, call the **Poison Control Hotline (1-800-222-1222)**. Trained health professionals are on duty 24 hours a day to answer questions and provide guidance and advice. Officials recommend putting the number in all family cell phones as well as programming it as a speed dial number on landlines, and prominently posting the number near home and phones.

About NJPIES

As New Jersey's only poison control center, the New Jersey Poison Information and Education System provides information on poison prevention and treatments. Chartered in 1983, NJPIES provides free consultation through telephone hotline services and the Web. Medical professionals such as physicians, registered nurses and pharmacists offer confidential advice regarding poison emergencies and provide information on poison prevention, drugs, food poisoning, animal bites and more. These specialists are available 24 hours a day, seven days a week.

NJPIES coordinates state poison education and research and is designated as the regional poison center by the New Jersey Department of Health and Senior Services and the American Association of Poison Control Centers. It tracks incidences of adverse reactions to food, drugs and vaccines in order to monitor potential public health issues and provide data to the U.S. Food and Drug Administration and the Centers for Disease Control and Prevention. A division of the Department of Preventive Medicine and Community Health of the New Jersey Medical School of the University of Medicine and Dentistry of New Jersey, its state-of-the-art center is located on the school's Newark campus.

New Jersey residents seeking immediate information about treating poison emergencies, and those with any drug information questions, should call the toll-free hotline, **800-222-1222**, anytime. The hearing impaired may call **973-926-8008**. For more information, visit www.njpies.org or call **973-972-9280**.

About UMDNJ

The University of Medicine and Dentistry of New Jersey is the nation's largest freestanding public health sciences university, with more than 5,500 students attending. The state's three medical schools, a dental school, a graduate school of biomedical sciences, a school of health-related professions, a school of nursing and a school of public health are housed on five campuses — Newark, New Brunswick/Piscataway, Scotch Plains, Camden and Stratford. Annually, there are more than 2 million patient visits at UMDNJ facilities and faculty practices at the campuses. UMDNJ operates University Hospital, a level I trauma center in Newark, and University Behavioral HealthCare, a mental health and addiction services network.
